W E LIST 200 of the leading and best varieties of seeds and take greatest care to secure only the best strains. Our seed is grown especially for us by the most reliable growers in various parts of the United States, so that it may be produced in the section that is best suited for the variety. For example, our Lima Bean seed is grown in California, Beans in Idaho, Cantaloupe in Colorado, Corn in Connecticut, Spinach and Turnip in the state of Washington, Peas in Wyoming, Onion Sets in Illinois, etc. Contracts are placed twelve to eighteen months before the seed is to be delivered or before the grower plants the seed stock. This is done to secure only fresh and highest-quality seeds for our customers.

Forty-one years' experience as seedsmen and commercial growers has taught us that only the best strains are worth while. We endeavor at all times to secure the highest-quality seeds obtainable and to offer them at minimum prices. All seed is carefully tested and none is allowed to be sold that we know to be poor in germination or in any way inferior.

Our store is located opposite the Penna.-Reading Railroad Station at Sewell, N. J., twelve miles south of Camden. We welcome customers and friends to our store and shall be glad to show our seeds and plants.

TERMS

Seeds and Supplies: Cash with order, otherwise shipment will be made C. O. D. **Plants:** Cash with order, no C. O. D. orders accepted. Remittance can be made by Check, Postal Money Order, Express Money Order or Registered Letter. You are protected by our safe delivery guarantee.

The fact being well known that no reputable seedsman now guarantees seeds in any respect renders it unnecessary for us to say very much on this point, because it must be apparent to every intelligent person that no seedsman can afford to send out poor or worthless seeds. There could be no more certain way of destroying his business.

While we exercise the greatest care to have all seeds, plants,

and bulbs pure and reliable, we give no warranty, express or implied, as to description, purity, productiveness, variety, or any other matter of any seeds, plants, or bulbs that we send out; and we will not in any way be responsible for the crop. Therefore in no case will Orol Ledden & Sons be liable for more than the amount actually paid us for seeds, plants or bulbs. If the purchaser does not accept the goods on these terms, they are to be returned at once and the money paid will be refunded.

All prices quoted in this Catalogue are subject to change without notice.

OROL LEDDEN & SONS

Safe Delivery Guaranteed

All seeds and plants are guaranteed to arrive in first-class condition, and if they do not, mail carrier or expressman should be notified on delivery. If damaged, request him to make notation of damage, sign, and mail to us at once, and more seeds or plants will be forwarded or money refunded.

Bush Lima Beans (California-grown)

Sow from May 1 to July 15

Fordhook. We have a reputation for handling an excellent grade of Fordhook Bush Limas. Our Beans are all hand-sorted, extra large, good croppers, and almost free from cracked Beans. We supply a number of the largest growers, some of whom plant as many as 40 acres of Fordhook Bush Limas, and have been buying their seed supplies from us for thirty years. Especially grown by a leading grower who specializes in this variety. Requires 75 days from sowing to date of maturity.	\$0 40	\$0 35	\$0 30	\$13 20
Improved. A flat-pod Lima, which has steadily advanced in popularity for both home-growing and market use. The compact, bushy plants are very prolific, bearing huge pods in clusters of 5 to 7, averaging 5 inches long or more. Matures in 75 days.	40	35	30	12 60
Henderson's Bush Lima. A fine Baby Lima with productive bushes 20 inches tall. Each pod contains 3 or 4 small white Beans. Matures in 65 days.	35	30	25	10 80
Fordhook 242. New strain of Fordhook Lima developed for uniformity. Excellent yielder. Pods and beans slightly smaller than parent variety.	40	35	30	14 40

Beans, Bountiful

SPRING 1946 will see the first gardens planted in peacetime for several years. All those who helped our country to feed herself and her fighting men and allies during the war years are urged to continue their efforts. A large part of the world is still hungry, and by feeding ourselves we can help the situation greatly.

Ledden's Seeds and Plants are again offered as among the most reliable you can buy. They are the varieties which experience has proved to be best, and growers in our vicinity are our best advertisers as they spread the word about the quality of Ledden products.

Cabbage Plants *Plants ready May 15 to August 10*

Allhead Select. This is a great Cabbage and one of our best sellers. Head hard, slightly oval to flat in shape. One of the most used by kraut packers. We have sold millions of this variety to growers for kraut factories.

Chieftain Savoy. The crumpled-leaf variety, producing large heads. Should be planted in June, July, or August.

Copenhagen Market. An extra-early, good, round-heading, hard Cabbage, about one week later than Golden Acre.

Danish Ballhead. A very hardy, sure-heading, heavy variety which has proved to be one of the best keepers. A desirable Cabbage for kraut.

Early Jersey Wakefield. A very early, pointed-head Cabbage, compact and erect, with few outer leaves. Stem short; heads medium-sized.

Glory of Enkhuizen. Hard-heading, second-early, fine-grained. One of the best for kraut.

Golden Acre. This is the most popular early variety. Heads are of good size, perfectly round, solid, and very uniform and compact, having few outer leaves, which permits close planting. We have a very good strain from a reliable grower.

Late Flat Dutch. Enormous, flat head. Should be planted early in July as it requires a full season to head hard. Best late variety and also best winter keeper.

Marion Market. The heads are almost round and very solid. Early variety.

Red Rock. Hard-heading red variety.

Wisconsin All Seasons. A late variety, valuable as a keeper and for making kraut. Heads flat, 10 to 12 inches across and 8 inches deep.

Wisconsin Hollander No. 8 (Resistant Danish Ballhead). Splendid late Cabbage for storage, kraut, and shipping. Heads large globe shape.

Celery Plants

Plants ready July 1 to August 15

Emperor or Fordhook. Plants stocky and compact; stems thick, round and of fine quality. Fine for late fall use and winter storage.

Full Heart. Early green variety for home and market garden. Compact growth; blanches readily. Especially good for heart formation.

Giant Pascal. Grows large and is the leading late variety. Stalks are broad, thick, and solid. Extra good eating Celery; very brittle.

Golden Plume. A self-blanching Celery developed from Golden Self-blanching. Has been pronounced by authorities to be the best early variety. Blanches quickly and is very healthy.

Ledden Golden Self-blanching. Tall. The most popular and one of the best of all early varieties. For the past few years our stock has produced Celery of unexcelled quality and perfect growth. Everyone should raise this excellent variety. Stalks 26 to 28 inches tall, which blanch readily.

Sanford Easy-blanching. This good variety comes a little later than Golden Self-blanching and requires longer banking to blanch. Vigorous in growth and a splendid keeper.

White Plume. An early Celery with beautiful white leaves in center. Blanches pure white. Liked by some better than Golden Self-blanching.

Winter King. A strong grower and one of the best keepers. Blanches white when banked.

Tomato Plants

Field-Grown plants ready June 1 to July 10

We have specialized in the growing of Tomato plants during the past forty-one years. This year we will have about fifty acres of field-grown Tomato plants to offer to the commercial grower, canner and gardener. Almost all of our Tomato plant acreage will be planted in the leading variety, Rutgers. All of our Rutgers plants will be grown from New Jersey State Certified Seed. We expect to have field-grown Tomato plants ready the last week in May and throughout the month of June.

We will have greenhouse-grown Tomato plants to offer for transplanting to sash during March and April. We do not ship greenhouse-grown Tomato plants. The varieties that we will have in these are Valiant, Marglobe, and Rutgers.

Price, \$3.00 per 1,000

Marglobe Certified. A second-early, solid, very meaty, thick red Tomato, that ripens well up to the stem, making it very desirable for canning or table use. All of our Marglobe plants are grown from New Jersey State Certified Seed.

Rutgers Certified. The leading and best Tomato. This introduction by Lyman G. Schermerhorn, of the New Jersey Agricultural Experiment Station, is a leading development in Tomatoes. It compares in shape and size with the Marglobe but is slightly larger and a heavier yielder. The fruit ripens a deep red up to the stem, and runs very uniform in size. An excellent variety for home use, marketing, or canning. Canners who put up Tomato juice speak very highly of the variety, as it produces a juice which is deep red in color. All Rutgers grown from New Jersey State Certified Seed. Highly recommended.

Large Red Plum. Plum type. Larger and more blocky in shape.

Yellow Plum. Small yellow plum-shaped. Used for preserving.

FIELD-GROWN TOMATO PLANTS. Parcel Post or Express prepaid: \$1.00 per 100; \$1.75 for 200; \$2.75 for 500; \$4.00 per 1,000. Express or Parcel Post, f.o.b. Sewell: \$3.00 per 1,000. At store, 65 cts. per 100; \$2.00 for 500; \$3.00 per 1,000.

Ledden Rotenone Mixture

Mixture is back to pre-war strength of .85% Rotenone
Controls a Large Number of Insects and Pests
on Vegetables, Flowers, Shade Trees

Our own mixture containing .85% Rotenone. It is a complete insecticide, ready for use as it comes from the package—the best general dry dust for farm and garden. Highly recommended for the control of Mexican bean beetle, cabbage and cauliflower worms, cucumber and cantaloupe beetles, leafhopper, tomato hornworm, thrips, certain aphids and other insects that feed on vegetables, flowers, and shade trees. We are pleased to say that wartime restrictions have been lifted and we are again able to use the old prewar formula in mixing our Rotenone dust. This .85% mixture is above the average and it has always been our belief that this is the correct strength for general dusting of various crops. Lb. 25 cts.; 5 lbs. \$1.00; 10 lbs. \$1.90; 100 lbs. \$14.00, postage or freight prepaid. Lb. 20 cts.; 5 lbs. 90 cts.; 10 lbs. \$1.70; 100 lbs. \$13.00, f.o.b. Sewell, N. J.
